It is recognized as one of the best in the analytic tradition, but is not narrow in what it regards as worthy of acceptance. Heavily cited in the general philosophical literature, it is covered by all the major abstracting and indexing services, including the Arts and Humanities Citation Index® which provides access to current and retrospective bibliographic information and cited references found in the world's leading arts and humanities journals. In addition to Articles and Discussion Notes, the journal publishes Book Reviews and Book Notes as well as occasional commissioned Critical Notices.

The journal is read world-wide and has recently published contributions from North and South American, European and Asian as well as Australasian authors.
